

BESPOKE COLLECTION

Our Bespoke Luxury Bathroom Modules offer the ultimate experience in flexibility and design using the latest in environmentally superior marine vacuum technology which is currently used in luxury cruise ships and commercial airlines.

THE RANGE

The modules come in a range of four styles: a stand-alone toilet cubicle, a urinal wall panel, an accessible unit and also a stand-alone vanity. The uniqueness of each module is the width. Based on multiples of 0.9m, they have the ability to fold up into trolley sized compartments.

This allows the modules to be installed in any building with a standard doorway entrance. With that in mind, it is possible to install the modules in any number of configurations to suit the event design and venue.

The flexibility allows the event manager to showcase their creativity using custom design layouts for patrons and potential sponsors. including powder rooms and display areas.
